

CUBICLE TRACKING AND PARTS DESCRIPTIONS

5000 SERIES

GENERAL DESCRIPTIONS

Drapery Track

Drapery track system shall be Diamond Drapery Model Number 5000 complete with 1-1/8" x 3/4" extruded aluminum track channel, master carriers, carriers, end pulleys, and other required accessories for a complete and operational track system. Track channel available in continuous lengths up to 20 feet.

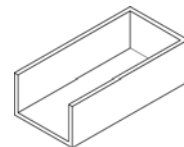

COMPONENT DESCRIPTIONS

5000-RNG Carrier with Metal Ring

Carrier shall be constructed of natural nylon body with molded in loop and nickel plated steel ring for curtain attachment. Body supported from two natural nylon wheels fastened by plated steel rivet.

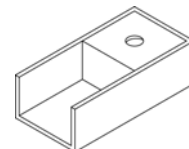

5000-03 End Stop

End stop of .032" minimum sheet aluminum die-formed with commercial clear anodized finish.

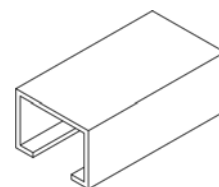

5000-04 End Stop with Pull-Out

End stops of .032" minimum sheet aluminum die-formed with commercial clear anodized finish. Pull-out of .032" minimum sheet aluminum die-formed and anodized with commercial clear finish. Plated machine screw permits removal of pull-out for access to track carriers.

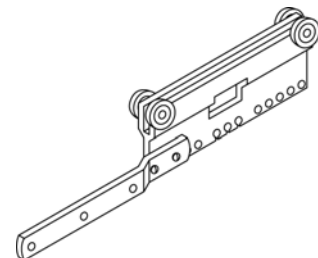

5000-05 Splice

Splice shall be made from extruded 6063-T5 aluminum with commercial clear anodized finish.

5000-21 Drapery Master Carrier with Offset Arm

Drapery master carrier with offset arm shall be made from heavy gauge nickel plated steel with attachment holes along the top. An offset arm made from heavy gauge nickel plated steel shall be provided to allow overlapping of the drapery ends. This master carrier will not work with tracks that are straight (not custom bent).

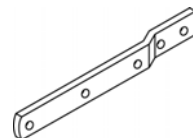

CUBICLE TRACKING AND PARTS DESCRIPTIONS

5000 SERIES

COMPONENT DESCRIPTIONS (CONTINUED)

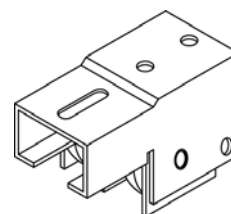

5000-23 Offset Arm

Offset arm made from heavy gauge nickel plated steel with attachment holes along its length.

5000-24 End Pulley

Drapery End Pulley enables the 5000 series track to be utilized as a traverse cord drawn drapery track. Each pulley is fabricated from heavy duty nickel plated steel. End pulleys can only be utilized on a straight length (Diamond Drapery Track Configuration #1) of 5000 series track and must be used in pairs. The 5000-21 master carrier enables the draperies to overlap and provides optimum coverage.

5000-31 Wall Bracket 2x2

This steel wall bracket enables the 5000 series track to be installed on a wall. Attachment holes on this bracket provide for easy installation.
